Venture Capital Valuation, Term Sheets & Cap Tables

Overview:

This boot camp is a 8-hour instructor-led virtual “Power Session” where trainees learn advanced Excel functionality using an intuitive, step-by-step approach. This seminar is designed for Excel users who would like to power-charge their productivity in Excel by learning lesser-known but highly-effective functionality.

What You'll Learn

VC Math and Cap Tables

- Cap Table Math: Dilution and price per share after new round
- Calculating Impact of Option Pool
- Calculating Impact of Multiple Investors
- Calculating impact of Convertible Debt
- Constructing a Cap Table
- Flow of Funds and Distribution Waterfall

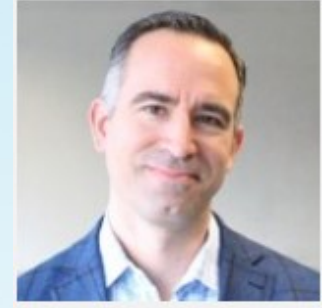

The VC Process and Term Sheet

- The early stage investing landscape
- A typical VC deal process and timeline
- VC return economics – why they need to hit home runs
- VC Valuation – back-solving into a pre-money / post-money valuation
- Understanding VC term sheets

Instructor's Profile:

Adam McGowan

Investment Banking Instructor

Adan's Diverse career in finance includes investment banking corporate finance and transaction advisory services consulting. Prior to Wall Street Prep, Adam was a Vice President at McNamee Lawrence & Co., a technology boutique investment bank, where he specialized in M&A and private financings. Adam was also a Senior Financial Analyst at one of the top 10 largest private companies where he assisted the company with its first debt offering.
