Ammar Mohanna, PhD

AI Lead at Aperture Solutions UK.

Assistant professor at Saint Joseph University – Beirut.

ABOUT

- Ammar is a seasoned professional passionate about leveraging Artificial Intelligence (AI) to drive innovation and solve complex problems. Currently serving as the AI Lead at Assentify, he specializes in developing cutting-edge InsurTech services. Ammar plays a pivotal role in assisting sister companies' AI teams, ensuring seamless integration and maintenance of products within an MLOps (Machine Learning Operations) environment.
- Beyond industry roles, Ammar is a dedicated educator, serving as a Lecturer at Saint Joseph University in Beirut. He imparts advanced AI-related courses for the Masters in Artificial Intelligence class, contributing to the next generation of AI professionals.
- In his previous role as an R&D AI Engineer at MYWAI SRL from August 2019 to August 2022, Ammar, holding a PhD in Edge AI from the University of Genoa, Italy, collaborated closely with client Subject-Matter Experts. He identified and implemented innovative AI solutions across various projects, extending his contributions to assisting development staff in writing polished, optimized code. This enhanced the utilization of AI and machine learning techniques. Ammar's academic background brings a research-driven approach to his practical applications in the field.
